

SUSTAINABILITY FACILITIES MANAGEMENT

Level 3 Apprenticeship

We personalise the learning experience and enhance knowledge and skills development

Facilities Management impacts on many individuals and organisations across the UK and adds value through a highly skilled workforce **creating efficiencies in service delivery and implementation.** Applying sustainable processes and practices, monitoring and solving sustainability problems which impact climate change in the facilities management function within each organisation.

Sustainable practices that facilities managers can implement include **reducing electricity and water** usage, **implementing waste management** best practices, and **adopting green cleaning**

On a day-to-day level, **effective Sustainability Facilities Management provides a sustainable, cost effective and environmentally friendly working environment**, which is essential to the performance of any business whatever its size and scope. Within this fast-growing professional discipline, facilities managers have extensive responsibilities **for providing, maintaining, and developing myriad services.**

These range from property strategy, space management and communications infrastructure to building maintenance, administration, and contract management

Tack TMI Bespoke Apprenticeships are a solutions focused training provider governed by sector specialists. Our programmes are inspired by you and crafted by us
